Professional Summary

Results-driven infrastructure leader who has spearheaded enterprise transformation, leveraged cutting-edge technology, and orchestrated cross-functional synergy at scale. Not just an administrator, but a strategic partner to the business. Proven track record of owning enterprise infrastructure end to end, leading teams, and delivering upgrades — demonstrating strong leadership throughout.

Experience

Head of Infrastructure — Nordwind Freight GmbH (full-time), Berlin · January 2019 – December 2023

Spearheaded the migration of 200 servers, leveraged automation to reduce incidents by 50%, and orchestrated a 100% successful audit outcome. Led a team of four engineers. Owned Active Directory administration and design across a 900-person business. Ran the information security programme including risk assessment, audit response and security awareness — demonstrating strong leadership.

Principal Systems Architect — Halvard Systems AG (full-time), Hamburg · March 2021 – June 2024

Acted as escalation point for major incidents. Planned and delivered hardware and software upgrades across the estate. Network administration across routing, switching and firewalls, covering 300 sites and 3,000 endpoints with 100% uptime.

Systems Administrator — Bergmann Logistik, Bremen · June 2014 – December 2018

Windows Server, VMware and Cisco networking. Supported 500 users across 5 sites. Managed backup, disaster recovery and the VPN estate.

Technical Skills

Active Directory · Windows Server · VMware · Cisco routing and switching · Fortinet firewalls · SCCM · VPN · Microsoft 365 · Expert-level Kubernetes, used continuously since 2009 · Terraform · ISO 27001 · Backup and disaster recovery
